Vet Online Supply Inc. is a small US based manufacturer and online retail reseller of holistic pet products.

NEWS

Vet Online Supply Surprise \$3M West Coast Sales Contract

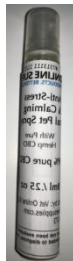

KELSEYVILLE, CA , Feb. 26, 2018 (GLOBE NEWSWIRE) -- Vet Online Supply, Inc. (OTC PINK:VTNL) (the Company), announces today its new contract with GCS Corporation to launch the company's Pet CBD Products in over 5,000 marijuana dispensaries starting along the west coast from Southern California to Seattle Washington.

Dan Rushford, CEO, stated, "I recently announced our purchase orders for January and February 2018 of \$529,790 and \$245,000 with a major retailer which will allow our Company to start the process to purchase-back shares of the company in order to focus on anti-dilution measures, stock price increases and minimizing the number of shareholders as we target the New York Stock Exchange listing procedures, along with our new program designed to provide prorated dividends to our shareholders.

"We've been negotiating with a cannabis retail company to place our CBD Pet Products on the shelves in marijuana dispensaries. They have agreed to start placing product in March-2018. We are expecting \$3M in purchase orders for this sector of our market. We feel that a large majority of customers utilizing the marijuana dispensaries are also pet owners. Our CBD Pet products are beneficial and unique."

Dan Rushford, CEO, further stated, "We anticipate high consumer traffic with a more keen interest in purchasing our products throughout the 20,000+ dispensaries in the USA. Statistics indicate the estimated number of cannabis businesses in the United States as of 2017 are between 20,000 and 28,000 cannabis businesses. In many cases, reality has outperformed expectation. After looking at the huge marijuana product sales in Colorado and Washington, cannabis industry analysts GreenWave Advisors raised their forecast for revenues for the industry in 2015. They now expect cannabis revenue to reach about \$25 billion by 2020. They also expect the CBD market to grow to \$3 billion by 2020. Our CBD Pet Products are high-quality."
